Projects

1. Varaikol 🔗

Built an drawing assistant that generates drawing references, converts photos into sketch outlines (OpenCV), and analyzes drawings by detecting the drawing medium using a custom-trained SigLIP model and generating improvement feedback using a RAG-based knowledge base.

2. ClarityVision 🔗

Developed a healthcare system that detects blood cancer from blood cell images and patient medical records, identifies autoimmune diseases using ANA test values, and extracts and translates medical reports using OCR.

3. AI Code Generator 🔗

Developed a RAG-based coding assistant for DSA practice with a Streamlit frontend using LangChain, ChromaDB, and LLaMA3 to generate optimized solutions in five programming languages and also integrated LangSmith for monitoring.

Education

B.Tech — Artificial Intelligence and Data Science

St. Joseph's Institute of Technology

Graduated: 2026

CGPA: 8.83

Skills

- **Programming Languages:** Java, Python, C
- **Frontend:** React.js, HTML, CSS
- **Backend & Frameworks:** Node.js, Flask, Streamlit, REST APIs
- **Databases:** MySQL, MongoDB, ChromaDB
- **Cloud & Operating Systems:** Linux (Ubuntu), AWS EC2 (Basic), Azure Data Factory (Basic)
- **Tools:** Git, GitHub, Figma, Canva, Microsoft Excel

Experience

1. Machine Learning Intern — Asyncronix (itnt)

June 2026

- Contributed to the prototype development of an intelligent exoskeleton system by working with Raspberry Pi 5 and OpenCV. Developed a computer vision model to estimate joint angles for gait analysis and real-time posture recognition.

2. AIA Azure Intern — Cognizant

February – April 2026

- Gained hands-on experience in Azure Data Factory, Azure Synapse Analytics, and Power BI, implementing a Medallion Architecture (Bronze, Silver, Gold) data pipeline for data ingestion, transformation, and analytics while developing interactive dashboards for business insights.

3. AI Research Intern — Sri Gurubhyo Technologies (Remote)

April – June 2025

- Built a multilingual OCR and translation pipeline using Flask, Tesseract, and Deep Translator for 116+ languages, with an interactive HTML and CSS interface for smooth image upload and text extraction

Achievements

- Presented paper on "LLM-Powered Code Generation Using RAG Framework with LLaMA 3" at RV College of Engineering, Bengaluru on 21 November 2025
- GeeksforGeeks Campus Mantri St. Joseph's Institute of Technology (2024–2025)
- Organized and hosted two coding events "St. Joseph's × GeeksforGeeks" with 200+ participants
- Participated in the Finals of the AI Innovate Hackathon conducted by Sri Eshwar THIRAN 2025

Certifications

- NPTEL Certifications: Introduction to Operating Systems (Elite), Python for Data Science (Elite), Data Mining (Elite), Database Management Systems, Introduction to Machine Learning (Elite).
- Achieved a score of 161 (B2 CEFR Level) in the Cambridge English Linguaskill Business Test
- Typewriting Senior English & Tamil (First Class)
