Education

B.Tech — Artificial Intelligence and Data Science
St. Joseph's Institute of Technology

Graduated: 2026
CGPA: 8.83

Projects

1. ClarityVision — AI-Powered Healthcare System 🔗

Developed an AI system for blood cancer detection from medical images and prediction of cancer and autoimmune diseases using patient data. Integrated OCR for medical report extraction and translation.

2. AI Code Generator (RAG-based) 🔗

Built an AI code generation assistant using LangChain, Streamlit, and ChromaDB with RAG (LLaMA3); integrated LangSmith for monitoring and reduced response time by 40%.

3. Claims Fraud Detection Analysis 🔗

Developed a fraud detection system using XGBoost, Random Forest, and Logistic Regression with explainable AI. Built with Flask and deployed on AWS EC2.

Skills

- **Programming:** Java, Python, C
- **Web & Backend Development:** React.js, Node.js, Flask, Streamlit, HTML, CSS
- **Databases & Tools:** MySQL, ChromaDB, Git, GitHub
- **Cloud & DevOps:** Linux (Ubuntu), AWS EC2, Docker (Basic), Azure Data Factory (Basic)
- **AI / ML:** Machine Learning Fundamentals, OpenCV (Basic)
- **Testing:** Selenium (Basic)
- **Concepts:** REST APIs, Containerization
- **Design & Productivity:** Figma, Canva, Microsoft Excel

Experience

1. Machine Learning Intern — Asynconix (itnt) June 2026 – Present

- Contributed to the prototype development of an intelligent exoskeleton system. Worked on Radxa ROCK 5B and Raspberry Pi 5 to integrating computer vision, joint sensor data, and Reinforcement Learning (RL) techniques to analyze gait patterns and enable real-time posture recognition.

2. AIA Azure Intern — Cognizant 31 January – 30 April 2026

- Gained hands-on experience in Azure Data Factory, Azure Synapse Analytics, and Power BI, implementing a Medallion Architecture (Bronze, Silver, Gold) data pipeline for data ingestion, transformation, and analytics while developing interactive dashboards for business insights.

3. Data Engineer Intern — Vebbox Software Solution 1 June – 29 June 2025

- Designed and validated 15+ e-learning modules, improving data accuracy and learner engagement, and implemented analytics tracking to measure user performance and learning outcomes.

4. AI Research Intern — Sri Gurubhyo Technologies (Remote) 1 April – 31 May 2025

- Built a multilingual OCR and translation pipeline using Flask, Tesseract, and Deep Translator for 116+ languages, with an interactive HTML and CSS interface for smooth image upload and text extraction

Achievements

- GeeksforGeeks Campus Mantri — St. Joseph's Institute of Technology (2024–2025)
- Organized and hosted two coding events — “St. Joseph's × GeeksforGeeks” with 200+ participants
- Solved 180+ problems on LeetCode, 1000+ on Skillrack, and 100+ on GeeksforGeeks

Certifications

- NPTEL Certifications: Introduction to Operating Systems (Elite), Python for Data Science (Elite), Data Mining (Elite), Database Management Systems, Introduction to Machine Learning (Elite).
- Achieved a score of 161 (B2 CEFR Level) in the Cambridge English Linguaskill Business Test
- Presented paper on “LLM-Powered Code Generation Using RAG Framework with LLaMA 3” at RV College of Engineering, Bengaluru on 21 November 2025
- Typewriting Senior — English & Tamil (First Class)
